DIRECTIONS FOR USE

MAXX FLUSH safe throughout the entire growing season. For best results, apply before signs of stress or circumstances that decrease moisture penetration. MAXX FLUSH can be added to any FERTI MAXX fertility product and most other fertilizers. Do not mix with calcium. To increase performance in hard and/or poor water quality, use MAXX FLUSH more often at lower rates. Different conditions such as water quality, weather, and soil type/quality will affect the application frequency and amount of product needed to achieve optimum results.

APPLICATION RATES / INTERVALS

FERTIGATION SYSTEMS: For best results, start with 32 ounces of MAXX FLUSH per acre distributed evenly over a 4-week period. If water penetration is still low, increase use rate by 8 ounces per acre. Repeat usage rate increase until desired water penetration is achieved. Repeat, as necessary.

FOLIAR APPLICATIONS: Apply 1 to 3 ounces in a minimum of 2 gallons of water per 1,000 square feet every 3 to 4 weeks. Apply only as directed.

SHAKE WELL BEFORE USING

STORAGE INFORMATION:

Keep container tightly closed. Store in a dry, well-ventilated, and cool location, away from direct sunlight or where freezing is possible. Failure to follow storage guidelines may lead to product degradation. For Commercial Use Only.
KEEP OUT OF REACH OF CHILDREN & PETS
