

Keep your property looking its best with EZ-FLO!

When a Quality Image Counts!

Companies invest heavily to present a quality image. EZ-FLO supports your quality image by ensuring that the **entire landscape is healthy and a cut above the ordinary!** By gently feeding the turf, trees, flowers and shrubs, every time you water, EZ-FLO delivers a superior looking landscape. System sizes available for HOA's, malls, office complexes, hotels, resorts and retail establishments.

Enhance your property's curb appeal!

The look of your landscape is a major factor in the look of the entire property. The continuous micro feeding of the EZ-FLO System keeps the entire landscape looking its best, all the time. With the EZ-FLO system, landscapes are healthier and more disease and insect resistant. EZ-FLO will also reduce or eliminate fertilizer runoff that can cause unsightly stains and damage to sidewalks, parking lots and streets. EZ-FLO is capable of delivering organic products that safely repel deer, gophers, moles, voles, geese, insects, and more.

EZ-FLO Systems save you money!

The financial decision to install EZ-FLO is simple, **EZ-FLO saves you money. When using EZ-FLO the annual fertilizer budget including the EZ-FLO equipment cost is generally less than conventional fertilization methods and all application labor is virtually eliminated.** Savings also come from a combination of reduced water bills and the elimination of separate manual applications of insect and pest controls or other specialized horticultural products. Studies have **documented water savings from 20% to 50%** due to the superior root systems
