EZ Ball Valve Coupling Connector

Ball valve coupling (CBV) connectors are available in sizes 3/4" through 2" with socket x socket connections. They are PVC schedule 40 with 1/4" nylon barbed tubing connectors. They are used to connect the EZ-FLO hose and drip systems to the irrigation flow line with the 1/4" flexible tubing provided with the EZ-FLO system. They provide the ability to adjust the differential pressure between the inlet and outlet connection to the irrigation system flow line.

EZ Ball Valve Connections larger than 1" have a slight reduction that does not affect line pressure and flow

Part Number	Size	A	B
CBV-075	3/4" Soc	7"	1"
CBV-100	1" Soc	8"	1 1/4"
CBV-125	1 1/4" Soc	9 1/2"	1 1/4"
CBV-150	1 1/2" Soc	10 3/4"	1 1/4"
CBV-200	2" Soc	12 1/2"	1 3/4"

Reducer bushings will adversely affect the flow process of EZ FLO Connections and may never be used to install EZ Ball Valve Connections
