

Organically Balanced - Highly Concentrated

EZ-GRO water soluble fertilizers are a unique blend of highly concentrated plant nutrients, organic bio-stimulants, and beneficial micro-biology. This unparalleled formulation provides astonishing results without any complicated mixing and measuring. The resulting affect is a total landscape solution that beautifies while reducing weeds and insects naturally.

Incredible Results

EZ-GRO fertilizers simultaneously promote deep greening, strong root development, vibrant colors and large blooms. The EZ-GRO blend is perfectly balanced to effectively feed the entire landscape regardless of the types of plants. The unique nutrient package is designed to repair and detoxify soils damaged by traditional chemical fertilizer applications. Through the rebuilding

of the soil structure, EZ-GRO fertilizers

promote root development and overall plant health which dramatically reduce weeds and insects throughout your entire landscape. EZ-GRO water soluble fertilizers are the perfect choice for everything you grow.

**Week 1****Week 4**

Consistent greening and growth

The results shown are from applying EZ-GRO at a rate of 1/3 of a pound per 1,000 square feet per month.

Superior Economics - A Little Does A Lot

- ▶ 4 to 5 times more effective than other fertilizers
- ▶ Naturally reduces insects and weeds
- ▶ Use up to 50% less water on your landscape
- ▶ 100% Eco-Friendly formulation

EZ-GRO fertilizers are a super concentrated blend of unique organic micro-biology and bio-stimulants combined with synthetic plant nutrients which allow for dramatically lower application rates. The typical home landscape can flourish with only two pounds of fertilizer per month. With the EZ-GRO combination, all landscapes are able to receive a complete dose of the beneficial elements in one application.

Easy to Use - Saves Time

- ▶ No mixing
- ▶ No measuring
- ▶ One step application

A Green Solutions Company™

When EZ-GRO fertilizers are used with EZ-FLO applicators there is no mixing, measuring or guessing required. The EZ-GRO blend is a perfectly balanced combination of synthetic nutrients and organic elements. With the EZ-FLO applicator all you have to do is place the appropriate amount of the EZ-GRO blend into the tank and the applicator takes care of the rest. All of the mixing and measuring is automatic so you can fertilize the landscape in minutes through your hose or every time you water with a hose end sprinkler or drip system. With the one step EZ-GRO fertilizer and one step EZ-FLO applicator you no longer need multiple products and applicators to care for your entire landscape.

Less Time + Less Fertilizer = A Flourishing Landscape
